Letter To Self (Draft 1)

Jun 05, 2024, 4 min read

#7enf

12 Dear Year 9 Me

Welcome to the big high school. As I'm you I got some advice because it will be a interesting experience to say the least.

Friends

I know your in a friend group from primary school, don't get me wrong you know them, its makes it easy. But getting out of your comfort zone making new friends is a good thing. The current friend group is nothing compared to the people you will meet. Last year 2023 you and your future friends all went and stayed on pigeon island in the middle of the lake. Hopefully that's enough persuasion to talk to some new people.

place Living

Jacks Point is a nice place to live much better than Auckland. Lately Auckland is really going down hill it now, there was a drive by shootings in Onehunga just the other day. Jacks Point is great too because Hanleys Farm is just next door. You end up making a few friends that live there witch is nice because they are right there.

Interests

Over the next 4 years you spend a hole load of money on miscellaneous tech hobbies. There were a few cool ones and some that stuck. The one your about to get into is virtual reality this as cool as it is doesn't stick around. There is a funny ending to this how ever after owning it for 9 months you sell it to Jodie for nearly full price. One of the coolest one that has stuck thus far is FPV drones, I understand if you need to make a google search to know what it is. You build your own drone from almost scratch a very cool experience to look forward to.

Future Highs And Lows

I can say there is plenty to look forward too and to watch out for. One awesome trip to absolutely look forward to is pigeon island. Just after level 1 exams you and a group of your friends go out to the small island down

Glenorchy way and stay in a small hut for 2 nights. We had the whole island to ourselves. There be be some lows ahead lessons to be learned. You will find out your super dyslexic, and get the long awaited knee surgery. The knee surgery turns into a good experience in hindsight. Having (a.c.c) pay for a wealth of services. The hospital is a big private hospital way cleaner than any other public one and a year of gym you will put to good use you wait!

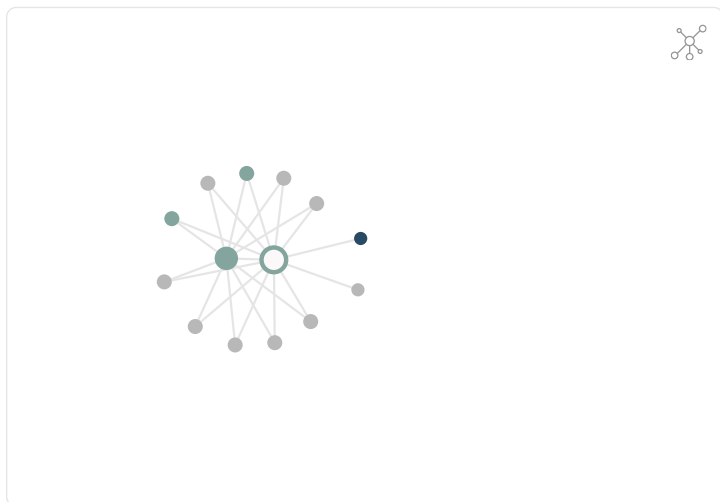

What Most Important To You?

I would say at the moment the most important thing to me is my friendships. This has always been a priority even you now. Friend ships is something you will have to build its a skill. Friends will keep you in one piece when you reach your lows and celebrate your highs this goes both ways. I would also say another important thing to me are my hobbies pass times. Friends are number one but also hobbies like coddng and electronics are impor- tant. These hobbies over the year have taught me more than you could imagine. If you really want to learn of be- come better at something you have to apply your self to getting better.

Who Are You Now

I think you'd be quite surprised at where your at in 3 years time somethings i'm sure you can guess a few. I think you'd be impressed with the level of Independence that you have now. Most mornings i catch the six am bus and go gym or I go into town with friends on the public bus. I almost never have to rely on mum or dad to shuttle me anymore except for work but that's justified... The short you will become one of those weird older kids from the high school you would always avoid because they are scary. I mean i can't say kids aren't scared of me but its a hole different world when you get to my age, I think you will like it.
